Introduction

Dear customer!

We are very pleased that you decided to purchase this product from kstools. Thank you for your confidence in us. You can find all the information you need in these operating instructions. Please read the instructions completely with care and observe the advice given. The operating instruction is part of the item and should be kept intact.

If you have any uncertainties or further questions, please contact: customerservice@competitiontools.com

1. Provisions for use

The manufacturer is not liable for personal injuries and material damages which result from improper use.

2. Technical data

512.4510

With connecting cord and plug:	Yes
Luminous flux:	1200/200 lumen
Battery weight:	0.096 kg
Voltage Plug:	5 V
Battery rechargeable:	Yes
Battery composition:	Lithium (rechargeable)
Battery weight class:	Lightweight class
Lithium Info:	Lithium in product (built-in or enclosed)
Luminous flux min:	120 lumens
Luminous flux max:	1200 lumens
Norm:	IP54+IK08
Light source:	LED COB + SMD Spot LED
Battery capacity [Ah]:	5 Ah
Number of batteries required:	1
Weight [g]:	600 (weight of lamp, without cable)
Luminous duration max:	35 h
Battery voltage [V]:	3.7 V
Battery technology:	Lithium-ion
Main light source:	COB LED

3. Safety and usage instructions

Tools may in principle only be used for the purpose intended, under the conditions envisaged and within the limitations as to their use.

4. Commissioning

ATTENTION: Please charge the lamp for 8 hours at a time before using it for the first time.

The COMPETITION LED work lamp has two operating modes:

Spot - Front Main 100%- Front Main 50%- Front Main 10% -OFF. If left in any mode for over 3 seconds, the next press will turn the light OFF.

Dimming:

After switching on the front LED, press the ON/OFF switch to dim the light intensity in three stages.

Emergency light:

If the lamp is in the charging station and the power supply is interrupted, the lamp automatically switches on the emergency light.

5. Charging the battery

Fold up the rubber cover on the top of the lamp. The USB-C charging port is located underneath.

You can also use the existing charging station. Connect the charging station to the charging cable.

Place the lamp in the station. The LED now lights up green.

ATTENTION: NO charging cable is included in the scope of delivery.

In view of the widespread use of the USB-C standard and the increasing availability of corresponding cables in private households and companies, we have decided not to include USB-C charging cables in our packaging. This measure allows us to conserve resources and be more environmentally conscious by utilising the equipment that users already have.

Fully charge the lamp as usual using a USB-C charging cable. The maximum charging time is 6-6.5 hours. Use a mains source with 5V/1A. When charging, the control LED indicator lights up and shows the current charging status.

6. Important safety information

Never intentionally point the light beam directly into your own or other people's eyes. If a beam of light hits your eyes, consciously close them and immediately move them out of the beam of light. For commercial use, the national safety regulations must be observed.

7. Maintenance

Incorrect or defective replacement parts can lead to damage.

8. Checks

All tools are to be checked for damage.

9. Disposal

The tool is to be disposed of or recycled in accordance with the legislation of the respective country.

10. Guarantee

The KS Tools Werkzeuge und Maschinen GmbH guarantee applies for all tools that are used under normal usage conditions.

The following are excluded from the guarantee:

- **Consumables** e.g. any type of cutting tools, cutting inserts and disks, cutting and scraping tools, brooms, brushes, files, batteries, bits or bit sockets, rotor blades in pneumatic devices, isolators on heating coils, any type of fuses, carbon brushes, etc.
- **Faulty functioning** of parts that show usage-related or other natural wear and tear, as well as tool defects that can be traced back to usage-related or other natural wear and tear.
- **Defects** in the tool that can be traced back to a failure to observe the operating instructions, improper use, use under abnormal environmental conditions or unsuitable operating conditions, overloading or improper maintenance.
Also defects in tools caused by the use of accessory parts or other parts that are not KS Tools original parts.
- Tools which have been modified or equipped with additions.
- Minor deviations from the intended quality that are however insignificant for the value and suitability for use of the tool.

The guarantee period is 12 months in cases of industrial or equal use.

The guarantee period starts on the date of purchase by the commercial end customer. The date of the original purchase receipt is decisive. For technical products with limited guarantee types A, B and C, the user must principally submit the purchase receipt in addition to the serial number of the device, if present.

The guarantee applies under consideration of the guarantee type for the duration specified in the price list valid on the day the product was purchased.

If no guarantee claim exists for the product (expiration of the guarantee time, guarantee exclusion for the reasons listed in Sec. 2) but the repair is still possible, this will only be carried out following approval of the cost estimate by the user.
